

Year 1 – Summer 2 – Sensational Scientists

Key Knowledge

- To observe and describe weather associated with the seasons.
- To observe and describe how day length varies across the year.
- To learn who Mary Anning, Mae Jemison and George Washington Carver are and what they are famous for.
- To know that a fair test means we test one thing at a time and we try to keep everything else the same.
- To know that different materials may help ice melt at different speeds.

Key Skills

- To ask simple questions, recognising that they can be answered in different ways.
- To perform simple tests.
- To observe closely, using simple equipment such as magnifying glasses.
- To use observations and ideas to suggest answers to questions.
- To gather and record data to help in answering questions.

Do you remember learning?

- How to carry out a fair test?
- Different types of materials?
- About astronauts and space when we wrote space fact files?
- The name of the four seasons and what the weather is like in each?

Key Vocabulary

- Observe, equipment, test, data.
- Mary Anning - palaeontologist
- Mae Jemison - astronaut
- George Washington Carver – botanist
- Seasons, Spring, Summer, Autumn, Winter, year, months, days, day length, weather

Mary Anning

Mae Jemison

George Washington Carver
